#### **INTRODUCTION**

Technogroup a full - fledged industrial group set up its first manufacturing unit during 1998 in the name of "Techno Fiber" - Technical Factory for Fiberglass Products. As the country is moving on a fast track towards infrastructure development, the demand for construction related materials is high. Considering the momentum, we decided to expand our existing products range as follows

- Fiberglass Metering cabinets for electrical and water.
- Fiberglass sewerage items.
- Fiberglass Tanks and vessels.
- Fabrication of fiber hangers, gratings, tanks
- and vessels etc.

In Techno Factory Contact Molding Department (CMD), a variety of products are manufactured using state of the art technologies. We work close with our customers and make products according to their requirements. With our high quality products we gained trust of many stakeholders such as Saudi Arabian Oil Company (ARAMCO), Royal Commission for Yanbu and Jubail, Ministry of Environment, Water and Agriculture, Ministry of Municipal and Rural Affairs and Ministry of Housing.
